

HRIK KAUSHIK

Guwahati, Assam

+91 8812821324 ✉ hritikkaushik@gmail.com hr1t1k.github.io/Portfolio/

Education

Royal Global University

August 2018 - July 2022

Bachelor of Technology in Computer Science & Engineering (CGPA of 8.92)

Assam, India

Experience

Cognizant Technology Solution

Feb 2023 – July 2023

Programmer Analyst Trainee

Remote

- Got Trained on **C#, ADO.NET, MySQL and PL/SQL**.
- Created Web API for **Student Management System** which allows Inserting ,Altering and displaying student information using **C#,ADO.NET,MySQL** and **Library management system** using **PL/SQL**

Projects

Tasks Web App | *React, MongoDB, Firebase, Bootstrap* | 

- Dynamic and responsive **To Do website**, streamlining task management and enhancing user productivity.
- **Intuitive task management**: Enables effortless creation, addition, removal, and editing of tasks within multiple customizable lists.
- Leverages **Firebase** integration for seamless and secure **sign-in/registration** experience.
- Built using a robust combination of Vite, **React**, **Express API**, and **MongoDB** for efficient development, data handling, and scalability.

Will Be There | *React.js, Node.js, MongoDB, Tailwind CSS, Firebase* | 

- Developed a collaborative RSVP web application during a hackathon, facilitating event creation, management, and attendance tracking for users within a short duration of 3 weeks.
- Developed custom APIs that can be integrated into the user's apps and created auth middleware to protect user's data from any unauthorised access.
- Leverages **Firebase Authentication** for secure sign-in/sign-up.
- Integrated third-party services like **Cloudinary** for handling images and **Nodemailer** for sending mails.
- Configured and deployed the backend on the Firebase **cloud function** for scalability and cost-effectiveness.

Dr1vee | *React, Firebase, Bootstrap* | 

- Dynamic and responsive **cloud file management web application**, inspired by Google Drive, to empower users with secure and efficient file storage and organization.
- Facilitates seamless file and folder management, including uploading, deleting, renaming, and downloading, ensuring a versatile user experience.
- Leverages **Firebase Authentication** for secure sign-in, **Cloud Firestore** and **Firebase Storage** for optimized file storage and management, and **Firebase App Check** for enhanced backend security.
- Integrated **Algolia** into Firebase backend as extension for efficient and real time search features.

Achievements

- **Knight at Leetcode**, with a highest rating of **1962** in the contests, i.e ranked under 20K out of 5L (**top 3.5%**).
- 3 star in Codechef with highest rating of 1751 and global rank 8927.
- Ranked **16** in Weekly contest 123 (Coding Ninjas) , solved more than **950+** problems on Leetcode and **1000+** problems on Coding Ninjas.
